Dear Parents/Carers

Further to our letter last week regarding the building works that are being carried out on Woodside Avenue, I have had communication from Drew Smith, the contractors on the site. They have asked me to contact parents to explain that these works involve a new junction and traffic works which will last approximately six months. During this time the pedestrian route will change several times in order for the work to be carried out safely.

Despite our letter last week, the contractors have noticed that students have not been following the traffic management footpaths and have been walking into the road, alongside moving traffic, which is obviously extremely dangerous. Can we please reiterate the importance of students following the designated route for their own safety. If your child walks to school this way, please speak to them about the dangers and if possible suggest an alternative safe route to and from school.

Thank you for your continued support.

Yours sincerely

Krista Dawkins
